**Internal:**
All colleagues and students within the School of Computing & Communications, Dean of Faculty, Faculty Associate Deans, Academic colleagues within the University; University administration; Members and Departments involved with the security institute; members of staff responsible for research innovation and engagement

**External:**
Commercial and industrial research collaborators and sponsors; EPSRC, European Commission; Professional bodies; Potential students and their parents

**Major Duties:**

To take a leading role in the University’s research, engagement and teaching activities, especially protection science/ cyber-security and closely related areas, as follows:

1. To drive internationally leading research and engagement within the field of cyber-security by:
   - Carrying out and driving original research, individually or collaboratively, leading to the high quality impact and engagement with a wide range of security and protection science users. For example, dissemination/publication of results in high quality internationally peer-reviewed academic journals and conferences, holding influential external advisory positions.
   - Leading a coherent, independent and self-sustaining group of researchers and PhD students.
   - Identifying and securing significant funding for new research contracts and grants.
   - Maintaining an international reputation for research quality and engagement by, e.g., organizing international workshops, acting as PC Chair for respected events, acting as external examiner at high-ranking institutions, giving invited presentations at international events, etc.
   - Contributing significantly to the multi-disciplinary research and engagement activities within the School.
   - Maximising impact from research and engagement through proactive involvement with business partnerships and public engagement activities.
   - Supervising and mentoring research staff and students.
   - Developing high quality engagement strategies and operational plans with a range of security and protection science users

2. To contribute to the teaching commitments of the School by, for example:
   - Teaching, examining and undertaking administrative duties on undergraduate and postgraduate programmes.
   - Carrying out curriculum development in the form of design and/or revision of courses offered by the School and its international partner institutions.
   - Innovating in teaching practice by, e.g., publishing a well-received text book, introducing a novel teaching method, introducing a new programme of study, etc.
   - Supervising project dissertations undertaken by undergraduate and postgraduate students.
- Undertaking personal development in teaching skills and practice.

3. Other:
   - To play a leading role in one or more School committees that support the running of the School.
   - To undertake a senior administrative role within the School, and/or security institute (e.g., year tutor).
   - To undertake an administrative role external to the School (e.g., at Faculty or University level).
