### Major Duties:

1. Improving scientific and engineering understanding of how to design and build digital technologies that enable collaborative and sustainable logistics considering privacy, ethical and commercial concerns of collaborative logistics in the UK.

2. Working with key policy and industry stakeholders to design and develop new standards and policy tools where digital technology acts as an enabler of sustainable and collaborative last mile logistics.

3. Preparation of conference and journal papers for publication of project findings.

4. The development of impact materials and resources for communicating the project findings and leading to impact.

5. Participation in writing new research proposals that build on the expertise developed in this project.

6. To collaborate with industrial, policy and research project partners.

7. Participation in all project meetings, preparation and presentation of talks, posters and reports to disseminate the results of these studies.

8. Participation in national and international conferences and workshops to present the results of the project to a wider audience and to learn about current advances in the field.

9. Any other duties appropriate to the grade, as directed by the Principal Investigator or his representative.
