## JOB DESCRIPTION

**Job Title:** Lecturer in Statistics

**Present Grade:** 7/8

**Department/College:** Mathematics and Statistics

### Directly responsible to

Head of Statistics Section and Group Lead

### Supervisory responsibility for

Postgraduate students and research associates

### Other contacts

**Internal:** Students, academic and non-academic staff within the University

**External:** Academic and industrial collaborators, research funding bodies, governmental and non-governmental organisations, learned societies

### Major Duties:

To contribute to the Department’s research profile by
- undertaking research in any area of statistics that has a strong application focus;
- publishing high-quality research in statistical and application-domain journals;
- presenting papers at specialist and international conferences.

To contribute to the Department’s teaching commitments by
- teaching on undergraduate, postgraduate and external training programmes, as appropriate;
- leading the development of new modules and the revision of existing ones;
- supervising MSc dissertations and undergraduate projects.

To contribute to the activities of the Statistics Section by
- engaging in research collaborations beyond the mathematical sciences;
- applying for and securing external research funding;
- supervising PhD students and research associates, including in the STOR-i centre for doctoral training.

To undertake a range of administrative duties as directed by the Head of Department.
